

## Web dashboard node for create UI

Assignment date	12 November 2022
Team Id	PNT2022TMID19880
Project Name	Real-Time River Water Quality Monitoring and Control System
Maximum marks	4 marks

- If you design a proper and modern UI dashboard, it will give the users easy access to the information they need.
- For this to happen, the dashboard information needs to be easy to scan and contain only the key information.
- But, with many tools available, it can be hard to make the right choice or not exaggerate with the use of features.
- This is one of the many roles of a UX designer and as such, it demands knowing certain tricks to be handled the right way
